**“TRAINABILITY - Integrated System for Employment Targeted Training Accessibility for the Weak Players”**

## PROJECT:

The TRAIN-ABILITY project pursues the following general goal:

-Conceive, achieve and test an integrated System, named Train-Ability System, for accessibility, adaptability and validity of the Vocational Training Processes for employment purposes, addressed to weak social players-  
The project has a duration of 24 months and is scheduled to be completed at the end of February 09.

## TARGET GROUP:

The Project is essentially addressed to public and private subjects operating in training apparatuses, such as:

- Assessors,
- Designers,
- Teachers/Trainers,
- Enterprise Managers or Decision-Makers who have the role to design, build, finance and supply training paths.

## OBJECTIVES:

The specific objectives of the Train-Ability project are the following:

- Conduct a survey in each participating country regarding the evaluation techniques for access to training and the customisation techniques of the training paths.
- Conceive, design and develop a model - called the Train-Ability Model - for evaluating the vocational, "employability" and "trainability" potential of the weak excluded or at risk at exclusion parties from the training market.

- Conceive, design and develop a set of training programming methodologies and techniques finalised towards the adaptation of the interventions to target the weaker players which the Project has defined to be the direct and final recipients.
- Conceive, design and implement a set of software tools aiming to allow the operational application of the Train-Ability Model but also allow for their methodologies and techniques to be applicable to the most diverse contexts of vocational training.

## RESULTS:

The project will produce the following results:

- An analysis and evaluation Report on main existing methods and tools for evaluating the access processes towards training for employment purposes and for customising training,
- The Train-Ability System comprising of the following components:
  - The metric system for applying the Train-Ability Model,
  - The system for applying the methodologies and Train-Ability techniques,
  - An original software package, named by the Project "Trainwear",
  - A Portal containing
    - the Train-Ability System,
    - virtual environments
    - services
    - community management
- A Technological Infrastructure providing the Train-Ability Portal and all the Services connected to the System,
- An Organisational Infrastructure, named Train-Ability Teleservices Centre,
- A set of Guides and Manuals, multimedia, for using the Train-Ability System,
- A DVD-Rom containing all the products developed including Guides and Manuals for using the Train-Ability System and the Software Package.

"TRAINABILITY - Integrated System for  
 Employment Targeted Training Accessibility for the  
 Weak Players"
